Numbers™ Seating Numbers 24" Fixed Height Stool

MODEL#: 22889

OVERVIEW

Numbers stool is a winning answer for creating inspirational classrooms around the world. The stool delivers impressive benefits that add up for students and schools – great value, quality and comfort in a compact, sleek design. This stool answers the need for value-driven, high quality classroom solutions with international design appeal. Numbers' product specifications comply with BIFMA, EN, & GB standards for durability, performance and sizing. ([View Height Guide](#))

MATERIALS

The blow molded shell is polypropylene material that features a waterfall front seat pan to allow for comfort and 360-degree movement. The shell's top surface includes a subtle woven pattern that allows for better airflow. Also, featured are two handles: 1) low, through hole to easily move, stack or clean the chair and 2) a curled seatback ledge to grip and lift. The taller continuous seatback adds upper back support, with a rounded top edge that can double as an armrest. Cover plate on underside of shell is made of polypropylene with integrated TPE skids. The TPE skids are soft to better protect surfaces when stacked.

The frame is constructed of a strong 22mm x 14-gauge steel tube frame with a 12mm (1/2") steel round rod foot rest. All frames feature a durable platinum painted finish. Comes standard with 20mm nylon glides with the option of adding felt glides. The stool is able to be stacked up to 4 high. Soft durometer skids on bottom cover plate prevents damage to shell when stacking. Weight capacity is 275 lbs.
